Angélique Porciani PhD

Biostatistician
30 avenue des quakers 30111 Congenies | +33 6 18 29 56 21 | angelique.porciani@gmail.com

Rigorous - Flexible - Dynamic

As a biostatistician with over 8 years of experience in statistical analysis applied to health and ecology, I have a strong expertise in R, advanced statistical modeling and international project management in collaboration with the pharmaceutical industry and academic partners. I now wish to put my technical and interpersonal skills to work in promoting the use of health data in an applied, innovative and collaborative environment.

Skills

Biostatistics

- Survival analysis (Kaplan–Meier, Cox)
- Mixed-effects and longitudinal models
- Sample size and power estimation
- PK/PD analysis
- Multiple imputation
- Data visualization
- Multivariate analysis (PCA, PLS…)
- Mathematical modeling (SEIR model)
- Machine learning (RF, SVM, HMM…)

Programming & tools

- **R** (ggplot2, tidyverse, dplyr, Quarto, broom, Git, coxme, drc, DHARMa)
- **SAS** (intermediate)
- Python (basic), SQL (basic)

Standards & quality

- Familiarity with GCP/GLP/CDISC standards
- Data management plan (DMP)
- Reproducible and traceable analyses

Languages French (mother tongue), English (fluent)

Professional competencies

- Clear communication of statistical results to **non-statistical stakeholders**
- Strong **autonomy and ownership** in project-based environments
- Ability to manage **multiple studies in parallel** and meet timelines
- Collaborative mindset in **multidisciplinary and international teams**
- Quality and delivery-oriented approach in regulated contexts

Publications & Projects

Complete list : ORCID
Code and analysis : GitHub

Professional Experiences

Biostatistician (researcher)

IRD Montpellier | June 2020 – December 2025 (5 years)

- Designed and executed Statistical Analysis Plans (**SAPs**) for observational and epidemiological studies with applications to **pre-clinical** research
- Performed advanced **statistical analyses** and **study design** including mixed-effects models, survival analysis, multivariate data analysis, **PK/PD,** longitudinal data analysis, data visualization and sample size estimation using R
- Contributed to **pharmaceutical-sponsored studies** in collaboration with Medincell, assessing efficacy and safety/tolerability outcomes
- Worked in **multidisciplinary and international teams** (biostatistics, epidemiology, data science, decision-makers)
- Managed multiple projects in parallel, ensuring **timely delivery** of analyses, reports and publications
- **Mentored** PhD and Msc students

Biostatistician/Data Analyst

IRD Montpellier | March 2017 – January 2020 (3 years)

- Conducted statistical analysis of experimental data in regulated research environments
- Developed robust and reproducible analysis workflow and data management plan
- Developed innovative methods to study the behavior of mosquitoes in presence of repellents and insecticides

PhD - Chemical ecology and behavior

IRD Montpellier - Benin | 2012 - 2016

- Designed experimental protocols and performed statistical analysis of biological data
- Implemented an electrophysiology and behavioral study platform in West Africa
- Published results in peer-reviewed journals and presented findings at conferences
- Supervised MSc students

Education

2019 - Master's Degree in Statistics for Life Sciences - University of Montpellier
2016 - PhD in Evolution, Ecology, Genetic Resources, Palaeontology - University of Montpellier
2012 - Master's Degree in Ecology-Biodiversity - University of Montpellier
2010 - Bachelor's Degree in Organism Biology - University of Montpellier
